

Teamwork Agreement Template

For the MathWorks Classroom Challenge Projects

Project: Image-Based Defect Detection for Manufacturing Inspection

Team Name: Image Defect Team 6

Instructor: Kevin Graham

Program/Class: Engineering Pathways Program's Mathworks Workplace Challenge

Members and Roles

1. Tadeh Mouradian - Project Manager & Modeling Lead
2. Julia Taylor - Documentation & Visualization Lead
3. Myo Aung - Analysis/Validation
4. Matthew Gonzalez - Quality Assurance & Reproducibility Lead

1) Purpose & Scope

We agree to collaborate to deliver a high-quality, ethical, and reproducible project. Our work will follow the project guidance and produce the specified artifacts (e.g. plots, code, and visualizations).

2) Roles & Responsibilities

- Project Manager (PM): Schedules meetings; maintains timeline; ensures tasks are tracked and disagreements are resolved.
- Modeling Lead: Owns core MATLAB models/simulations
- Analysis/Validation Lead: Performs hand calculations and cross-checks simulation outputs
- Documentation & Visualization Lead: Compiles report (with figures/tables), prepares slides (if needed), and builds visual artifacts (e.g. animations or plots)
- Quality Assurance & Reproducibility Lead: Enforces coherent style across artifacts, ensures work is not overwritten across different versions, ensures data quality, tests/re-runs codes to ensure robustness and reproducibility

3) Communication Norms

- Primary channel: Discord (e.g. Slack)
- Response time: 24 hours on weekdays and 24 hours on weekends (e.g. within 24 hours on weekdays; within 48 hours on weekends)
- Meeting cadence: Weekly discord meeting on the weekend (e.g. weekly working meeting (60–90 minutes on Tuesdays via Zoom))
- Decision records: PM logs major decisions on discord

4) Collaboration & Tools

- Version control: One shared GitHub repo
- Data management: All datasets, parameters, and assumptions documented in README.md
- File naming & style: Snake_case, descriptive names
- Backups: GitHub stored backups

5) Quality Standards (Definition of 'Done')

- Requirements meet project description, code is reproducible (runs from the README.md file, all specified figures regenerate, at least one teammate has tested edge cases, all assumptions, units, and references are documented in report)

6) Timeline & Milestones

- Week 1: Complete Task 1 and start Task 2
- Week 2: Complete Task 2 and start Task 3
- Week 3: Complete Task 3 and start Task 4
- Week 4: Complete Task 4 and start Task 5
- Week 5: Complete Task 5 and complete report

7) Decision-Making & Conflict Resolution

- Default: consensus after discussion; PM facilitates
- If blocked >48 hrs: Time-limited debate, majority vote, PM documents decision
- Technical disagreements: Evidence-based comparison before vote.
- Escalation: If unresolved, consult instructor/mentor with a concise memo.

8) Workload, Accountability & Attendance

- Task board: Document everyone's tasks for the week on discord
- Accountability: Missed deadline → recovery plan within 24 hrs; repeated misses trigger role redistribution.
- Attendance: If you'll miss a meeting, give 24-hour notice and share updates asynchronously.

10) Accessibility & Inclusion

We commit to respectful collaboration, equitable turn-taking, and flexibility for documented accessibility needs.

11) Deliverables Checklist

- Code repository with clear structure and README, hand calculations linked to modeled results for cross-validation, specific figures & visualizations, final report with specified sections

12) Agreement & Signatures

Name & Signature: Myo Aung Date: 7/12/2026

Name & Signature: Julia Taylor Date: 7/12/2026

Name & Signature: Tadeh Mouradian Date: 7/12/2026

Name & Signature: Matthew Gonzalez Date: 7/12/2026
